## Door System Check Valve

Freightcar America, Inc. has found another way to make the MegaFlo™ door system even better. We continually search for components to improve the MegaFlo's easy operation and to lengthen maintenance cycles.

Our new standard check valve, part number 10305-087, is just one example. The Teflon seal and brass construction are less susceptible to sticking when exposed to wet, dirty air. We have also found that by installing the check valve horizontally, there is less accumulated dirt and debris build up in the valve.

The check valve can be purchased through the Freightcar America, Inc. Parts Department, by contacting them at (877) 739-2006, or by logging on to our web site at [www.freightcaramerica.com](http://www.freightcaramerica.com).
