

VERSAFLOOD II™

HYBRID STEEL & ALUMINUM AGGREGATE HOPPER CARS

FREIGHTCAR
AMERICA™

FreightCar America's VersaFlood II hybrid steel and aluminum aggregate hopper car offers superior load capacity.

Achieve maximum productivity with FreightCar America's VersaFlood II. The hybrid design combines light-weight aluminum and steel to stand up to the most corrosive and abrasive aggregate commodities carried. Available with optional transverse or longitudinal door systems with easy-to-use and reliable touch-pad controls on the patented Automatic Independent Door System.

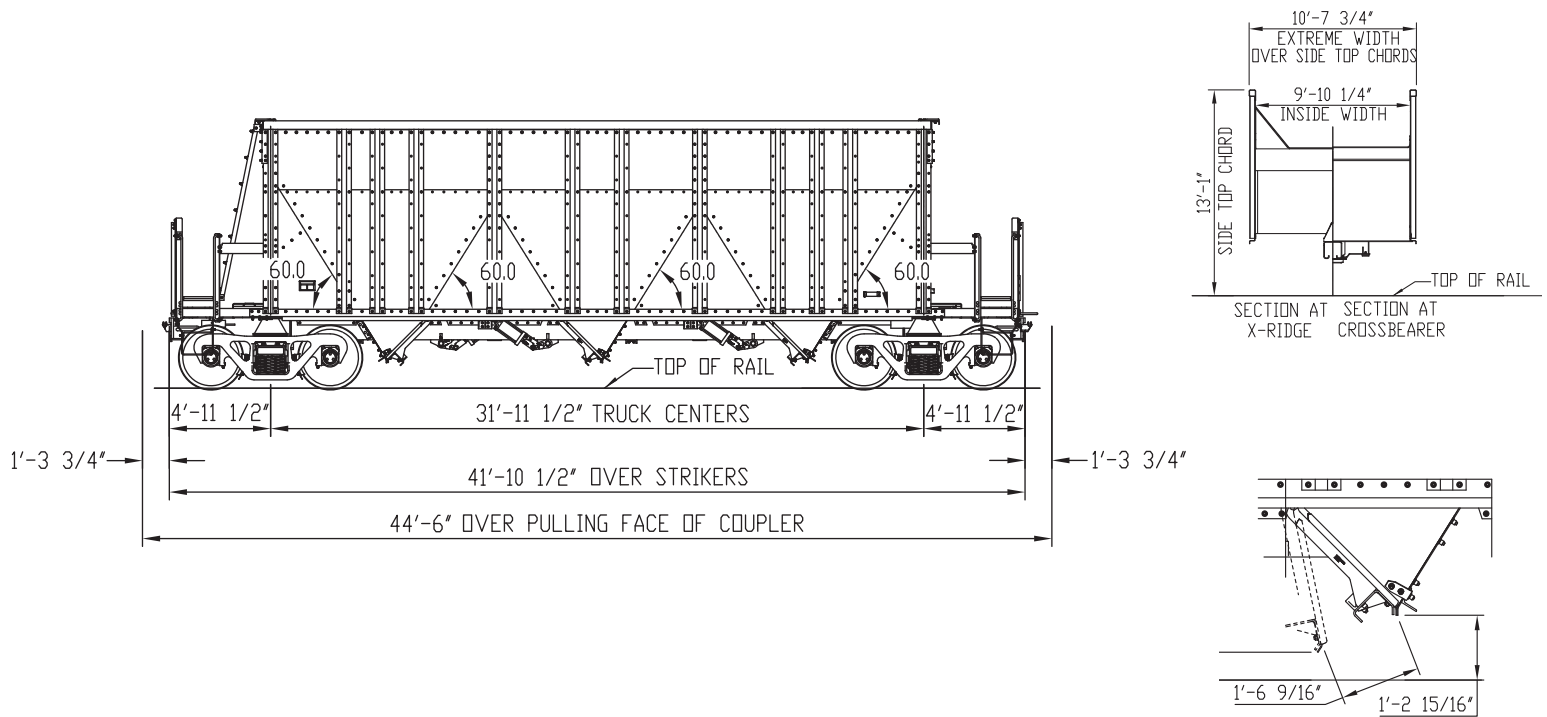

OTHER FEATURES INCLUDE:

- » Lightweight design which provides exceptional payload capacity and greater commodity options
- » Superior strength and durability of our patented one-piece, cold-rolled center sill and mechanically fastened sides and ends
- » Proven mechanically fastened design with reinforced top-cord corner supports
- » Available transverse longitudinal door options
- » Automatic Independent Door System, featuring an all-in-one, touch-pad control panel, allowing each door pocket to be opened individually or all at once

FREIGHTCAR AMERICA'S VersaFlood II products are purpose-built to offer reliable and productive heavy-haul transportation options tailored to your needs.
